

# Global Freshwater Biodiversity Atlas

[www.freshwaterbiodiversity.eu](http://www.freshwaterbiodiversity.eu)

The Global Freshwater Biodiversity Atlas is a new online gateway to freshwater biodiversity related maps and spatial data. It offers a comprehensive collection of **dynamic online maps** at global, continental and regional scales, accompanied by **short articles** providing **background information**. The Atlas facilitates the **discovery** and increases the **accessibility** of important scientific research results and data sources. Thus, it will be of great **value to scientists, stakeholders** at the science-policy interface, **conservation managers** and **interested individuals**.

## Explore the Atlas

FRESHWATER BIODIVERSITY

FRESHWATER RESOURCES AND ECOSYSTEMS

FRESHWATER PRESSURES

FRESHWATER CONSERVATION AND MANAGEMENT

[atlas.freshwaterbiodiversity.eu](http://atlas.freshwaterbiodiversity.eu)

The Atlas is a product of **collaboration** by numerous **scientists, organisations** and **projects** active in freshwater biodiversity research and conservation. Our map collection is continuously growing. We **invite** all members of the freshwater biodiversity community to help making it an **even more useful** and **extensive tool** by **contributing your maps** to the Atlas!

Contact us at: [atlas@freshwaterbiodiversity.eu](mailto:atlas@freshwaterbiodiversity.eu)

## You can contribute!

There are numerous ways to **contribute** to the **BioFresh network** of global freshwater biodiversity and to join in **taking freshwater biodiversity science, conservation and management to a new level**.
