

Physical Limnology 2021

Workshop – Block Course

In 2021, on video only.

The link will be communicated to the enrolled participants closer to the date.

Schedule of lectures: 22nd – 30th March 2021

Start time	Mon 22nd	Tue 23rd	Wed 24th	Thu 25th	Fri 26th	Mon 29th	Tue 30th
9:00- 10:00	B01	L1a	B04	L2b	B07	B10	L4a
10:00-11:00	B02	L1b	B05	L3a	B08	B11	L4b/B13
11:00-12:00	B03	L2a	B06	L3b	B09	B12	B14
afternoon	Ex-B1	Ex-L1	Ex-B2	Ex-L2	Ex-B3	Ex-B4	--

B Dr. Bertram Boehrer (Helmholtz Centre for Environ. Res. – UFZ, Magdeburg)

L Prof. Andreas Lorke (Univ. Koblenz-Landau, Landau)

Ex exercise sheet to solve

B01 - Stratification and circulation

B02 - Navier Stokes – eq.

B03 – Solutes, solubility

B04 – electrical conductivity, salinity

B05 – density

B06 - stability

B07 – surface waves

B08 – interfacial waves, seiche

B09 – internal waves

B10 – modal decomposition

B11 – Properties of internal waves

B12 – Ray Waves

B13 - Permanent stratification, meromixis

B14 - Climate sensitivity

L1a, b - Turbulence I: Introduction to turbulence

L2a, b - Turbulence II: Spectral characteristics and measurements

L3a, b - Turbulence III: Momentum and mass transport in turbulent boundary layers

L4a, b - Turbulence IV: Living in turbulence: biological – physical interactions
