

Internship at THE Environmental Research Center in Germany

You are looking for an interesting internship?

We are looking for motivated students interested in

- Limnology
- Biogeochemistry
- Aquatic Microbial Ecology
- Limnophysics
- Environmental modelling
- Lake and reservoir management

The Helmholtz Centre of Environmental Research (UFZ) is one of the leading environmental research institutes in Europe. In the Department of Lake Research we study the functions of lakes and reservoirs in the landscape with a strong focus on applied aspects (<https://www.ufz.de/index.php?en=34221>). We offer world class working conditions and dedicated supervision. We cannot offer a salary but ERASMUS+ support might be possible.
