

Dani Or is a professor of *Soil and Terrestrial Environmental Physics* at the Swiss Federal Institute of Technology (ETH) Zurich. His research focuses on mass and energy transport in porous media; mechanics of shallow landslides and debris flows; evaporation from porous surfaces, and on linking physical processes with biological activity in soil. Dr. Or has authored and coauthored over 290 ISI publications, co-authored a book, and over 450 proceeding papers and abstracts. Dr. Or is the former Editor in Chief of the Vadose Zone Journal, recipient of the Kirkham Soil Physics Award (2001), 2004 Fellow of the Soil Science Society of America, chair of the 2008 Gordon Research Conference on Flow and Transport, and 2010 Fellow of the American Geophysical Union. He was selected 2013 Birdsall-Dreiss distinguished lecturer; recipient of Helmholtz Inter. Fellow Award (2013); elected 2014 Fellow of Geological Soc. Am.; 2017 recipient of the European Geosciences Union Dalton Medal and the 2018 AGU Langbein lecturer (<http://www.step.ethz.ch/people/scientific-staff/prof-dani-or.html> or <https://scholar.google.com/citations?hl=en&user=mNdz5CMAAAAJ&view=sortby=pubdate>)
