

## License statement for the Water Quantity and Quality Database Germany v2 (WQQDB2)

01-16-2026

The data within the WQQDB2 was provided by the federal states of Germany. Between the federal states and UFZ – Helmholtz-Centre for Environmental Research, data usage agreements/ licenses have been established and agreed upon.

Most of these data usage agreements allow UFZ to use the data within the context of TERENO (Terrestrial Environmental Observatories) and water quality-related studies. The data usage agreements do explicitly exclude to share that raw data (i.e., concentration measurements at a certain location and time) with third parties outside the UFZ.

Following these agreements, we are not allowed to make the archived WQQDB2 publicly available.
